Congratulations on your purchase of a TAG Heuer Communication Instrument. You have made an excellent choice selecting the ultimate in innovation, quality and endurance - high-performance sports criteria that have been hallmarks of TAG Heuer’s commitment to its craft since 1860.

Each TAG Heuer Communication Instrument is built to meet the most exacting requirements. We paid the very same careful attention to detail on this communication instrument from design, conception to finishing that we constantly do on our watches for more than 140 years. The materials used in our communication instrument make them exceptionally resilient, even when used under the most rigorous conditions. Before a new TAG Heuer product is launched it is put through 57 reliability and quality tests.

With its modern, unique and timeless design, your new TAG Heuer Communication Instrument combines Swiss quality horology tradition with technology. We hope it will bring you complete satisfaction.
TAG Heuer Packaging Content

- 1 TAG Heuer phone
- 1 registration card
- 1 international warranty leaflet
- 1 quick user guide
- 1 CD-ROM (Including user guide and Data Suite to synchronize your contacts)
- 1 battery
- 1 charger
- 1 data cable
- 1 stereo headset

The packaging contents may vary in accordance with regional regulations.

**Note:**
- The items supplied with your phone and the accessories available at your dealer may vary, depending on your country or service provider.
- Use the purchased accessories with only authorized devices. The use of these accessories with other devices could cause problems and any repair costs would not be covered by the warranty.

Access menu functions

Use the soft keys
The role of the soft keys varies depending on the function you are using. The soft key area of the display indicates their current role.

By pressing the soft keys and navigation key:
1. Press a desired soft key.
2. Press the up/down navigation key to move to the next or previous option.
3. Choose [Select] soft key to confirm the function displayed or option highlighted.
4. To exit, choose one of the following methods.
   • Select [Back] to move up one level.
   • Press [End] key to return to home screen.

By pressing the TAG Heuer selection key from home screen:
Access directly to the WAP functions:

• **Homepage:** When you choose [Homepage] menu, WAP (Wireless Application Protocol) browser opens the main page of home site you have chosen among the sites in [Settings] [Profile].

• **Bookmarks:** You can make bookmark data in your phone. And you can connect to the site directly.

• **Recent Pages:** When you choose [Recent Pages] menu, WAP browser opens the latest WAP pages.

• **Enter Address:** If you know the URL of the site, you can go to the site directly by entering with the text editor the desired URL.

• **Service Inbox:** Your TAG Heuer phone receives WAP service messages and saves them in the WAP Push. You can read the message in the Inbox.

• **Settings:** This option allows you to set the WAP settings. There are several profiles of sites in your phone. You can activate one of them as a home site and change or set each profile.
   • Edit Profile: Shows the name of selected site and you can edit the profile(s).
   • Browser Options: Time out, Show Image
• WAP Push Setting: On/Off
• Clear Cache: clears the most recent site files that you have downloaded in the temporary memory.
• Clear Cookie: deletes cookies in the memory.
• Clear Recent Page List: clears recent page list in the memory.
• Clear Address: deletes all addresses, which you entered in Enter Address menu.
• Trusted Certificates: saves and lists the Trusted Certificates from the WAP sites. You can view and delete the certificates.
Using Keypad

ABC, T9, Number, and Symbol modes
You can enter text in some features such as Messages, Phonebook or Calendar, using ABC mode, T9 mode, Number mode, and Symbol mode.

You can enter text by pressing the alphanumeric keys on the phone.
Press the appropriate key until the character you want appears on the screen.
T9 Text editing mode is a predictive text input mode that allows you to key in any character using single keystrokes.
While you are in T9 editing mode, press the alphanumeric key once for one character. You will see T9 suggested words.

Text Input Options
While you are in text editing mode, you will be in several modes.
When you see [Option] and [Clear] in the soft key, press the soft key (left) for option: you can save the entry or change the text input method. To erase a character, press the soft key (right) next to the character you want to erase. There can be more than two options depending on what contents you are editing.
- Press and hold the [*] key to select Symbols.
- Press the [*] key to toggle select cases of abc, Abc, and ABC.
- Press [1] to enter periods or apostrophes automatically.
- Press [0] to insert a space.

You can define the default Input Method of your phone and change input methods time to time.
To define your preferred default input method, go to Phone Setup sub menu in Settings menu. Then select Preferred Input Method. Once you set the preferred input method, next time you edit in text input mode, the setting will be applied until you change to another. If you want to change the text input method temporarily, in the text input mode, press [Option] soft key, and select “Input Method” from the option.
- You can also change the text input method with the [#] key; the input methods will swap when you press the [#].
Installing the SIM card and battery

a. On the back of the phone, move the locking battery button to the left and lift the battery door.

b. Put the SIM card into the phone as shown. Ensure that the SIM card is inserted properly.

c. To place the battery inside the phone, align the bottom of the battery with the corresponding slots in the phone and close the battery door.
CHARGING YOUR BATTERY

Your phone package comes with a battery and a traveler's charger. You can also use USB data cable to charge your phone from your personal computer. Use only TAG Heuer batteries and chargers for your safety.

Note: It is highly recommended to fully charge the battery prior to using your phone for the first time. Charging average time is 2 hours.

1. After putting the battery into the phone, insert the mini-USB charging plug into the charging port on the bottom side of the phone.
2. Connect the traveler's charger to a standard AC outlet.
3. When charging is completed, disconnect the traveler's charger from the power outlet and from the phone by pulling out the charging plug.

Note: When the battery is completely discharged, and not used for a while, the phone will not immediately display the charging animation. After 15 minutes of charging, the phone will display the charging animation.

Low battery indicator

When the battery is low a warning tone sounds, “the low battery” message is displayed and the empty battery icon blinks. If the battery level becomes too low, the phone automatically turns off. Recharge your battery.
Power ON or OFF

1. Hold down the [End] key (red marking) for two second to switch on.
2. Enter your SIM card PIN code, if you have previously set one on your SIM card.

   The phone searches for your network and when detected, will display the home screen. The home screen displays the signal strength, charging level, current date and operator’s name.
3. When you wish to switch off the phone, hold down the [End] key for more than two seconds.

Note: If you enter the wrong Pin code three times in a row, the SIM card will be blocked. To unblock, you need to enter your PUK (Personal Unblocking Key) that is provided by your network operator.

Access Codes

There are access codes for your SIM card. These codes help you to protect the phone against unauthorized use. When requested for any of the code explained below, key-in the appropriate code (displayed as asterisks) and press the OK key.

- **PIN**: The Personal Identification Number or PIN (4-8digits) protects your SIM card against unauthorized use. The PIN comes with the SIM card; see the SIM card instruction provided with your card. If you enter an incorrect PIN three times in succession, the code will be disabled and cannot be used until you re-enable it by entering the PUK.

- **PUK**: The 8-digit PUK (Personal Unblocking Key) is required to change a disabled PIN. The PUK may be supplied with the SIM card. If not, or in case you have lost it, please contact your service provider.

To re-enable your PIN, proceed as follows.

1. Key-in the PUK and press the OK key.
2. Enter a new PIN of your choice and press the OK key.
3. When the Confirm New PIN message is displayed, key-in the same code again and press the OK key.
If you enter an incorrect PUK ten times in succession, the SIM card becomes invalid. Please contact your service provider for a new card.

- **Pin Password:** The 4 ~ 8 digits of password is required when you use the Call barring function. You can obtain the password from your service provider when you subscribe to this function.
The Settings menu provides various setting options to customize the phone to your preferences and needs. You can also reset the settings to their default values. To access this menu, press [Menu] on home screen and select [Settings].

User Profiles
Use this menu to customize various sounds. Select one profile and select “Activate” to activate the setting. Select “Customize” to customize the profile settings. Customizable options are the following:

- **Tone Setup:** Incoming Call, alarm, Power On, Message Tone and Keypad Tone
- **Volume:** Ring Tone, Keypad Tone.
- **Alert Type:** Ring, Vibration Only, Vibration And Ring, Vibration then ring.
- **Ring Type:** Single/ Repeat/ Ascending.
- **Extra Tone:** Warning/ Error/ Camp On/ Connect. Answer Mode: Any Key Answer, Send Key Answer and Auto Answer (when Headset, Bluetooth Mode)

1. **Bluetooth**

To connect this phone to other Bluetooth devices, set this option to On. Bluetooth icon will appear on the home screen. The phone’s Bluetooth power will be turned on, until you turn the Bluetooth Mode off. When you turn off your phone’s power, and turn on the next time, the Bluetooth power will be On. If the Bluetooth device was connected, the phone connects to the device when the phone’s power is back on.

**Note:** When you are not using the Bluetooth feature, set the Bluetooth mode to Off, in order to save the battery power.
Inquiry Audio Device
This option will search for Audio device(s) within the range of your phone (around 10 meters).

- Put the device nearest possible when you search a new device.
- Check to turn on your phone and the new device. For turning on your new device, see instruction provided by the device manufacturer. Make sure your phone is in Bluetooth mode.
- Select “Search Audio Device” to find the new device.
- After your phone finds the device, press [Pair] soft key (left), it might ask for a pass code. Default pass code is depending on the Bluetooth device. You might try 0000 as a pass code. Usually the Bluetooth audio device provides a guide with this pass code.
- The phone and device will be paired and connected. If you fail this pair procedure, try again or contact the device manufacturer, or change to other device.

My Device
This will display Paired Device(s), which have been connected and registered with your phone. You can conveniently connect to the most frequently used Bluetooth device by using this menu.

Option:
- **Connect**: you can connect to the listed Bluetooth devices.
- **Rename**: you can edit the device name.
- **Delete**: you can delete the saved device from the My Device list.
- **Search new device**: you can also search for new devices.

Settings
- **Visibility**: You can set your phone visible to other Bluetooth devices. If you set this On, other devices can search your phone as a Bluetooth device. You can only change this option when the Bluetooth Mode is On.
- **My Phone Name**: You can give your phone a name by using this option. When other Bluetooth device searches your phone, this name will be displayed.
- **Authentication**: Set Authentication On or Off. You can only change this option when the Bluetooth Mode is On.
• **Audio Path:** you can choose to play sound from the phone or to forward it to the Bluetooth headset.

• **FTP Settings:** Set shared folders of File manager when you send data by Bluetooth.

**About**
This menu will display your Bluetooth’s profile: A2DP, AVRCP, HFP, HSP, SPP, DUN, FTP and OPP. Check your other Bluetooth device guides to know if they are compatible with your phone.

**PHONE SETUP**

**Time and Date**
You can set time and date for your phone.

• **Set Home City:** This menu allows you to set a city as your home city.

• **Set Time/Date:** This menu allows you to set the current time and date displayed in the idle screen. Also you can set the day light saving to On/Off.

• **Set Format:** This menu allows you to set Time and Date Format.

• **Auto Update of Date and Time:** This menu allows the phone to update the current date and time automatically from the network. You can turn on or off this function by pressing the [On] or [Off] soft key.

**Language**
Use this menu to select one of the proposed languages for the display text. Select your preferred language and press [Ok] soft key (left) to save the setting.

**Display Settings**
This menu allows you to customize desired phone display items: wallpaper, screen saver, Power On/Off, LCD backlight, Show date and time, Show owner number and Show operator name.
Preferred Input Methods
This menu allows you to define your preferred input method. Once you set the preferred input method, next time you edit in text input mode, it will use the setting until you change it to another in this menu.

Speed Dial
Use this menu to assign speed dial numbers (2 to 9) for 8 of your most frequently called numbers.

Assigning speed dial entries
- Enable speed dial “On” and go to “Set Number”
- Select a key location from 2 to 9. Key 1 is reserved for your voice-mail server.
- Press [Option] soft key, and select ‘Edit’ and select the entry from the phonebook list by pressing the [Add] soft key.

Managing speed dial entries
- Edit: assign a different number to a key.
- Delete: clear the speed dial setting for a key.

Dialing speed dial numbers: On home screen, press and hold the appropriate key.

Dedicated Key
You can use the dedicated keys as shortcut keys to access specific menus directly from home screen.
Select from the menu lists, and press [Ok] key to change the dedicated menu.
Default Dedicated Keys:
- Up: Audio player
- Down: SMS edition
- Left : Bluetooth
- Right: Alarm

Shortcuts
This menu allows you to set shortcuts menu lists.
You can set your own menu shortcut and assign it to a dedicated key.
Schedule power On/Off
This option allows you to set up a power on and power off time for your TAG Heuer phone.

Sound Equalizer
This option enables you to set a type of sound effect for the sound tones (ring, warning…) available options are: Normal, Bass and Treble.

2. Network Setup
Network Setup helps you in Network Selection, selection of Preferred Network, and GPRS connection.

Network Selection
The Network Selection feature enables you to select automatically or manually the network used when roaming outside of your home network.

Note:
You can select a network other than your home network only if it has a valid roaming agreement with your home network. Please contact your service provider for further inquiry.

Options are as follows:

- **Automatic**: You will be connected to the first available network when roaming.
- **Manual**: The phone scans for the available network, and you can select the network manually.

Preferred Networks
You can set your preferred networks from list. You can Add From List, Create New, Change Priority and Delete.

Band setup
This option lets you select which band should the phone connect to.
Call Setup
The following Call Setup features are network services. Please contact your network service provider to check availability.

Caller ID
This network service displays your caller ID to the recipient when you call out. You can set the following options for the Caller ID function:

- **Set By Network**: The network will decide whether to send or hide the Caller ID
- **Hide ID**: If you do not want to send your phone number, select this option.
- **Send ID**: It will send your Caller ID when you call out.

Call Waiting
This network service informs when someone is trying to reach you during another call. You can specify the call waiting option for voice calls only.

Call Divert
- This network service reroutes incoming calls to the number that you specify.

**Note:**
The phone sends your settings to the network and the network will acknowledge the settings. You can deactivate all call diverting settings by selecting the Cancel All.

Call Barring
This network service allows you to restrict your call for outgoing and incoming calls. You can also cancel all call barring settings. You will be able to make and receive calls normally. You can set and change the call barring password obtained from your service provider using this option. You must enter the current password before you can specify a new one.

**Note:**
The phone sends your settings to the network and the network returns the acknowledgement. You can deactivate all call barring settings by selecting the Cancel All.
Line Switching
This option lets you select which line you want to use (providing you have multiple lines on your SIM card and have primarily subscribed to a multiple line service).

Call Time Reminder
You can set the call time reminder. Options are Off, Single, and Periodic.

Call Time Display
You can set the phone to display the call duration.

Auto Redial
This option allows you to set an automatic redial when the call receiver is busy. If you set [Auto Redial] on, it will redial 5 times until successful call.

Closed User group
This option allows you to define a group of users permitted to communicate with each other but not with users outside the group (network dependant).

3. Security Setup
Use this menu to protect the phone against unauthorized use by managing the several access codes of your phone and SIM card. There are six types of security setting categories. You can optimize security mode by choosing submenus in “Security Setup” in “Settings” menu. These security settings will help you to keep privacy and to prevent other people from using the phone without your permission.

Note:
If you enter an incorrect PIN/PIN2 three times in a row, the SIM card is blocked. To unblock it, you need to enter your PUK/PUK2 (Personal Unblocking Key). The codes are supplied by your network operator.
SIM Lock
When the SIM Lock feature is on, the phone only works when you enter the correct SIM card PIN code. You can set this option to OFF, the phone will not ask for your pass code when you switch it on.

Phone Lock
When the Phone Lock feature is on, user must enter the pass code each time the phone is switched on. Making a call or operating the phone is not available without the pass code.

Auto Keypad Lock
To prevent unwanted accidental key presses, you can use the auto keypad lock function. You may not make a call or operate the phone until you key in the unlock code.

Fixed Dial
When the Fixed Dial mode is enabled, the person using the phone can only call the phone numbers stored in the Fixed Dial List.
To call a number not stored in the fixed dialed list, you must enter PIN 2 code. If the SIM card does not have PIN2, this feature is not supported.

Barred Dial
When the Barred Dial mode is enabled, the person using the phone cannot call numbers in the barred dial list. To call a barred number, you must enter the PIN2. If the SIM card does not have PIN2, this feature is not supported.

Change Password
To change the password, input the current password, and then enter the new password.
Note:
The initial password is “0000.”
After you change your password, you will need to input the latest password. If you forgot your password, contact the service center.

4. Restore Factory Settings
This feature resets the phone to the same settings as those configured at the factory. It does not delete the downloaded objects and phonebook records. You will need to input password to restore factory settings. The initial password is “0000”.
You can store phone numbers on your SIM card and in your phone's memory. The SIM card and phone's memory are physically separated, but they are used as a single entity called “Contacts”. To access this menu, press [Menu] from home screen and select Contacts. Then choose the storage: To SIM or To Phone.

Add New Entry

Storing a number on the SIM card
- Enter information about the contact: name, phone number.
- Press [Save] to save the contact.

Storing a number in the phone’s memory
- Enter information about the contact: name, phone number (mobile, home, office, fax), company name, e-mail, birthday, associate picture and video, associate sound and caller group.
- Press [Save].

Quick Search
Use this menu to search for a desired contact in your contact list.

Finding an entry:
1. Enter the first few letters of the name you seek.
2. Select the name you want from the list.
3. Scroll to a number and press [Send] key to dial, or press [Option] to edit the contact’s information.
   - Send SMS: allow you to send SMS to the selected entry.
   - View: allows you to view the entry’s content such as name, number and so on.
   - Call: allows you to call the selected contact.
   - Send MMS: allows you to send a SMS to the selected name, number.
   - Edit: allows you to edit the entry items.
   - Send vCard: allow you to send a contact by SMS.
   - Delete: allows you to delete the entry.
   - Copy: allows you to copy the entry from SIM to Phone or Phone to SIM. You will have the same entry in a different storage.
• **Move**: allows you to move the entry from SIM to Phone or Phone to SIM. The entry will be stored in the original storage.

• **Duplicate**: allows you to duplicate the entry in the same storage. You will have the same data in the same storage.

**Call History**

Use this menu to view the calls you have dialed, received, or missed, and the length of the calls. You can also check the cost of your calls, if the SIM card supports this function.

1. **Missed Calls**
   This menu displays the most recent 10 received calls that you did not answer. In the missed calls list, you can view the details of the record by pressing the [Ok] soft key (left). In the view screen, you can call the selected number by pressing the [Send] Key. The following options are available:
   - Delete: Allows you to delete the record
   - Save to Phonebook: Allows you to save the record to your contact list.
   - Dial: Allows you to call back the recorded number.
   - Edit: Allows you to edit the number and save to your contact list.

2. **Dialed Calls**
   This menu displays the most recent calls you have dialed. In the dialed calls list, you can view the details of the record by pressing the [Ok] soft key (left). From there, you can call the selected number by pressing the [Send] key.

3. **Received Calls**
   This menu displays the most recent calls you have received. In the list of received calls, you can view the details of the record by pressing the [Ok] soft key (left). From there, you can call the selected number by pressing the Send Key.

4. **Delete Call Log**
   This menu lets you delete all call data of each category at once. The following categories are available: missed calls, dialed calls, received calls.
5. Call Time
This menu displays the time log for incoming/outgoing calls. The actual time invoiced by your service provider may vary.

- **Last call time**: check your last call duration.
- **Total sent**: check the total duration of all the calls you have dialed since the latest reset.
- **Total received**: check the total duration of all the calls you have received since the latest reset.
- **Reset All Time**: Allows you to reset the call timers. You need to enter the phone password.

6. SMS Counter
You can view the numbers of sent and received SMS.

7. GPRS Counter
You can view how many GPRS data have been sent and received, and reset the counter.

**My vCard**
A vCard is a multimedia business card, you can send to your contacts.
You can edit, save and send My vCard. You can use My vCard as your mobile business card.

- **Edit My vCard**: you can edit Name, Number, Home Number, Company Name, E-mail Address, Office Number, and Fax Number.
- **Send My vCard**: You can send My vCard by SMS, MMS, Bluetooth and File Transfer.

2. Copy All
You can copy all phonebook data from SIM card to Phone or from Phone to SIM. It is a useful function if you want to back up your phonebook data from a SIM card to your phone and vice versa.
3. **Delete**
You can delete all phonebook data in SIM card or Phone. In addition, you can delete the phonebook data one by one.

4. **SOS Number**
It provides you the list of SOS Number stored in the SIM.

5. **Caller Group**
Use this menu to organize your contacts in caller groups. Adding members to a caller group such as friends, vip...
1. Select a caller group.
2. Press [Option] and [Add].
3. Press [Edit]-[Option]-[Input Method] and [OK] soft key to change input method, and select “Done” to save.
- **Alert Type:** Ring / Vibration only / Vibration and Ring / Vibration then Ring / None
- **Ring tone:** Allows you to select the ring tone to be used when you receive a call from a person in the group. Select your ringtone by pressing Navigation key.
- **Picture:** Allows you to select the call picture displayed when you receive a call from a person in the group. Press Navigation key to change the picture and go to the next line to select. If you want to view and select images, select the [View] soft key (left) and scroll the Navigation key. To select the picture, press the [OK] soft key (left).
- **Associate Video:** same as picture with a video.
- **Member List:** You can add or delete group member(s). Press [OK] and select [Add]. It will display a phonebook list excluding the members already in the group. It is possible to set a member in multiple groups. Press [Save].

6. **Settings**

**Memory Status**
You can check how many names and numbers are stored in your contact list (SIM card and phone memories) or how much free space remains.
Preferred Storage
You can set your preferred storage either to SIM or to Phone as default storage when adding a new entry to your contact list.

Fields
There are fields that you can set on or off in your phonebook entry: Home Number, Company Name, E-mail Address, Office Number, Fax Number, Birthday, Associate Picture, Associate Video, Associate Sound and Caller Group. Press the [On] or [Off] soft key (left) to switch.

7. Extra Number
You can view and edit your mobile phone number (owner number), Service Dial number and SOS number.
Owner Number: Use this feature to check your phone numbers, or to assign a name to each of the numbers.
Service Dial Number: lists up the SIM SDN (Service Dial Number) and allows you to access to the number by pressing the [Dial] soft key (left) or the Send key.
Service Dial Numbers are provided by your network operator and implemented in your SIM card.

8. Caller picture
You can set a picture for any contact. The selected picture will be displayed when calling the contact and when receiving a call.
Select one image from the displayed list, select [OK] and link it to a New entry, a Selected Entry or a Caller Group.

9. Caller Ring Tone
You can set a ring tone for any contact. The selected ring tone will be played when receiving a call from the selected contact.
Select a ring tone from the displayed list, select [OK] and link it to a New entry, a Selected Entry or a Caller Group.
MESSAGES

Use the Messages menu to send and receive short messages and multimedia messages. You can also use voice-mail. To access this menu, press [Menu] from home screen and select Messages. Message functions are available depending on network services that your service provider supports.

1. SMS
The SMS (Short Message Service) function is a network service and your network may or may not support the service.

Note:
- The Message service may not be available on all networks. Some network allows it only within its own network.
- The maximum number of characters allowed in a short message varies by service provider. If your message exceeds the maximum number of characters, the phone will split the message.

Write Message
Use this menu to create and send a message as follows:
2. Write a message.
3. After you complete the message, press the [Option] soft key (left) and then select “Done.” Choose one of following options.
   Send Only: Sends the message to the recipient phone number. It will not save the message.
   Save and Send: Saves the message, and sends it to the required recipient.
   Save Only: Saves the message so that you can send it later.
   Send to Many: Sends the message to multiple recipients. Select Edit List to add up to 10 recipient(s).
   Send by Group: Sends the message to the Caller Group. Select a Caller Group from the list.
You can input the number directly or get from the phonebook by pressing the [Search] soft key (left).
The phone will display the Message sending Success or Fail message on the screen for all recipients.

**Note:**
If you receive a call while you are writing a message, the message will be backed-up and after the call finishes, the phone will display [write message] mode. You can finish the message without losing the data.

**Inbox**
This folder stores all of the messages you have received. You can view the new text messages or the read messages. It will display the sender’s phone number or name (if stored in the Contact list). If you press the [Ok] soft key, you can view the message content.

**Sent Messages**
You can view the sent or unsent messages you have saved. Send, Edit, Delete, Delete All and Use Number options are available.

**Draft**
This folder stores messages you have saved to send at a later time. When you select a SMS, it opens in Edit mode so that you can edit and/or send the message.

**Template**
Use this menu to make and use templates of frequently used messages. You can create the templates with sentences you frequently use so that you can retrieve and insert them when composing a message.

**Message Settings**
Within the Message Settings sub-menu, you can define default values on common parameters for mobile-originated messages.
• Profile Settings: Depending on your service provider and service plan, you can set the message profile settings.
• Common Setting: You can set on or off the following common settings for SMS.
  - Delivery Report
    When this function is set to on, the network informs you whether or not your
    message has been delivered.
  - Reply Path
    This menu allows the recipient of your Message to send you a reply via your
    message center, if the network provides Message service. Press the [On] or [Off] soft
    key (left) to switch.
• Memory Status: This shows memory status of SMS in your SIM card or Phone.

MMS
Multimedia Message Service (MMS) delivers messages containing a combination of
text, image, video, and audio, from phone to phone.

Note:
• The maximum size allowed for a message can differ, depending on your
  service provider.
• Depending on the file type or DRM (Digital Rights Management) system,
  some files may not be able to be forwarded.

Write Message
Use this menu to create and send a message as follows:
2. Compose a message. You can edit To, CC, BCC, Subject, and Content. You can
   input the number directly or get from the phonebook by pressing the [Search] soft key.
3. After you complete the message, press the [Option] soft key (left) and then select
   “Done.” Choose one of following options.
   Send Only: Sends the message.
   Save and Send: Saves the message, and sends it to required recipient(s).
   Save to Drafts: Saves the message to Drafts. You may send it later.
   Send Options: Validity Period, Delivery Report, Read Report, Priority
Exit: Exits the Write Message, the phone will ask if you want to save the message.
The phone will display the Message sending Success or Fail message on the screen
for all recipients.
Inbox
This folder stores all of the messages you have received. You can view the new text messages or the read messages.
It will display the sender’s phone number or name (if stored in the Contact list) on the list. If you choose the [Ok] soft key, you can view the message content.

Sent Messages
You can view the sent or unsent messages you have saved. Send, Edit, Delete, Delete All and Use Number options are available.

Draft
This folder stores messages you have saved to send at a later time.
When you select a SMS, it opens in Edit mode so that you can edit and/or send the message.

Template
Use this menu to make and use templates of frequently used messages. You can create templates with the sentences you frequently use so that you can retrieve and insert them when composing a message.

Message Settings
Within the MMS sub-menu, you can define default values on common parameters for mobile-originated messages. By setting default values for MMS messages, you can experience a more comfortable service.
You can set up the MMS related parameters for sending and retrieving the MMS messages. Contact your network operator to obtain MMS settings.

Email
The E-Mail application allows you to send and receive e-mails. The application supports text and attachments. The e-mail application could be either normal POP3 e-mail client or IMAP4 based e-mail service. When highlighting on Inbox, Sent, Unsent and Draft, the number of mails shall be displayed as a popup hint, e.g., “10 mails”.
If current incoming protocol is set to IMAP4, and the phone is not currently connected to the network, when before entering this screen, shall popup a confirmation screen for the user with message “Do you want to connect to the network?”. If the user selects “Yes”, then can send list folder request to network; otherwise, directly enter this screen, and all popup hint displays “0 mails.”

Send and Receive
In order to exchange the email, the user has to provide appropriate settings (described in section Email Profile).

Write E-mail
This menu allows you to write an email.
To – contain the recipient’s list of the e-mail.
CC – contain the carbon copy list of the e-mail.
Subject – contain the subject of the mail.
Attachment – display attachment states of the email.
Priority – the priority of the mail. You can use inline selection to change the priority. There are “Low”, “Normal” and “High.” options.
Encoding Type – the encoding type of email body, including ASCII, BIG5, GB, UTF8
Content – contain the content of the mail. The whole content shall be display in a multi-line box. At most 7 lines can be displayed in this field.

Inbox
This folder stores the list of emails you have received.

Unsent
This folder displays the list of unsent e-mails.

Sent
This folder displays the list of sent mails. According to flash/ram size, the maximal number of mails to be displayed shall be dynamic.
Drafts
This folder displays the list of e-mail Draft you saved.

Delete All Folder
This folder helps you to delete all mails in selected folder.

E-mail Profile
This folder helps you to configure various servers and Profile related settings. All the configurable items are grouped into entities called Profiles.
Use this menu to keep track of your schedule. You can also use convenient features, such as Alarm, World Clock, Calculator, Currency Converter, Chrono…

To access this menu, press [Menu] from home screen and select **Business**.

**Agenda**

The calendar helps you keep track of your monthly schedule. When you access the Calendar menu, the calendar in Month view appears with today's date indicated by a green bow line.

**World Clock**

This feature allows you to check the current time based on Greenwich Mean Time (GMT) for major cities around the world. From the world map, scroll to the city you want. As the time line moves, the current day and time of the given zone displays. The screen also shows the Day or Night icon (☀️).

**Alarm**

This menu allows you to set the alarm to ring at a specific time. You can save up to five alarms. To stop the alarm when it rings, press the [Stop] soft key (left) to stop the alarm or press the [Snooze] soft key (right) to snooze the alarm so that it will remind you again in four minutes. You can also stop the alarm by pressing the lateral TAG Heuer button.

**Instruments**

This menu includes several usefull applications.

**Currency Converter**

To convert currency:

1. Input a currency rate.
2. Press the [Ok] soft key (left).
3. Select how you want the currency to be calculated. (xxx:1 or 1: xxx)
4. Input the local currency value.
5. Press the [Ok] soft key (left) to get the result.

Chrono
This is a tool to measure timing; Split Stopwatch, Lap Stopwatch and 4Way Stopwatch.

Countdown
This tool enables you to set a timer countdown. Input a timing by typing on the numeric keypad, press [OK] when set and [START] to begin. The phone will ring at the end of the countdown.

Calculator
Use this menu to perform basic arithmetic functions and memory functions; Addition, Subtraction, Multiplication and Division; Add to Memory, Subtract to Memory, Memory Clear and Memory Read.

Unit Converter
You can convert from one type of unit to another.

To convert a value:
1. Select the weight or length options.
2. Select the type of conversion to be performed.
3. Input the value to be converted, and then press [Ok] to get the result.
You can enter a decimal dot (.) using the [#] key.

Weight
Kg ↔ Pound, Kg ↔ Ounce

Length
Km ↔ Mile, M ↔ Yard
M ↔ Foot, cm ↔ Inch
The Multimedia menu provides you several multimedia functions.

**Camera**
You can use the camera module embedded in your phone to take photos. Before taking a picture, you can set your camera settings on screen by pressing navigation keys, alphanumeric keys, and [Option] soft key (left). You need to enter the preview mode (by sliding the camera shutter of your phone from home screen) to access these settings.

**Note:**
- Do not take photos of people without their permission.
- Do not take photos in a place where cameras are not allowed.
- Do not take photos in a place where you may interfere with another person’s privacy.
When you take a photo in direct sunlight or in bright conditions, shadows may appear on the photo.

**Taking and Saving a Photo**
1. From home screen, slide the camera shutter to start the preview mode.
2. Set your camera by using [Option] or alphanumeric keys.
3. After having set the view, take a picture by pressing the [Tag Heuer] selection key.
4. If you want to save the picture, select the [Save] soft key (left) and edit the picture name, and press the left soft key [Option] then select “Done.”
You can view the image in the Image Viewer.

**Image Album**
You can view your images by choosing [Image Album] menu in [Multimedia] menu. It will display the photos with thumbnail, image name, and image size.
Video Recorder
With TAG Heuer phone, you may record videos with the Video Recorder menu. Options:

- **To Player**: allows you to go to the Video Player.
- **Camcorder Settings**: allows you to set various types of camcorder settings as White balance, EV, Scene mode and Banding.
- **Video Settings**: allows you to set various types of Video settings as Video size, Video quality, File size limit, Record time limit, Record audio and Encode format.
- **Effect Settings**: allows you to have various types of effects to your video.
- **Storage (Phone / Memory Card)**: allows you to select the storage for saving images.
- **Restore Default**: allows you to restore to the video recorder’s default settings.

Video Album
You can view the recorded video with the Video Player. Press the side volume key to adjust the volume.

Music Playback
You can listen to MP3, MIDI, WAV, AMR, AAC, iMelody music files with the Audio Player.

To view the music list, Press [List] soft key. It will display available music list from the phone.

To play the music, From the music player screen, press [List] soft key and select the song you want then select “Play.”

To make a play list from the selected directory:

1. Access the Audio Player.
2. Press the [List] soft key (left).
3. Press the [Option] soft key (left) and select **Settings**, and set the **List Auto Generate** to **Off**.
4. Select **Add** from the [Option] menu, the phone will display the File Manager. Using the navigation keys, highlight the desired directory or file in the File Manager.
5. Press the [Option] soft key (left), and select. The music files in the selected directory will be added to the play list.
Sound Recorder
With this menu, you can record sound in AMR, WAV format and use it as voice memo, ring tone, MMS and EMS attachment.

File Manager
Use this menu to navigate into the stored files. You can open files and perform several actions on the files as described below. You can also see the total memory used and free space in the storage.

Checking the Memory.
You can view the remaining (free) memory and total memory.

Opening the memory storage
- Open: allows you to open the storage, and view folder(s) and file(s).
- Create Folder: allows you to create a folder.
- Format: allows you to format the selected memory. Be careful that it will delete all data files in the storage.

Opening a Folder
- Open: allows you to open the folder and view a list of files in the folder.
- Create Folder: allows you to create a folder.
- Rename: allows you to edit the folder name.
- Delete: allows you to delete the folder.
- Sort: allows you to sort the files in the folder by name, by type, by time and by size.

Opening a File
You can view, play, and setup files in the storage or the folder.
- View / Play: allows you to view or play the file.
- Forward: allows you to forward the file to use as the following: Image File (bmp, jpg, and gif format) options are available to forward to Wallpaper, Screen Saver, Power On Display, Power Off Display, Phonebook, MMS and EMS.
Sound File (mid, wav, mp3, AMR, AAC and iMelody format) options are available to forward to Tone Setup, MMS, EMS and Bluetooth.

- **Detail**: displays information of the file, date and size.
- **Rename**: allows you to edit the file name.
- **Copy**: allows you to copy the file to the other folder or other storage.
- **Move**: allows you the move the file to the selected folder or storage. The file will be removed from the original folder and copied to the selected folder.

**Note:** After selecting Copy or Move option, press the left or right navigation keys to access to the upper or lower folder.

- **Delete**: allows you to delete the selected file.
- **Delete All Files**: allows you to delete all files in the selected folder.
- **Sort**: allows you to sort the files by name, by type, by time, and by size.

### Internet Services

**SERVICE +** (depends on SIM)

If you use a SIM card that provides additional services, the sim toolkit menu displays. For details, please refer to your SIM card instructions or contact your service provider.

**WAP**

This menu allows you to access to internet services for mobile. This menu is also accessible from home screen by pressing the TAG Heuer selection key. Please refer to this paragraph in your guide for description of this menu.

### Data Account

This menu allows you to change the settings for the GSM and GPRS network services. For further details, contact your service provider.

**GSM**

This setting allows you to change the settings for the GSM network as following (information provided by network operator):

- **Account Name**: Edit the account name.
- **Number**: Enter the server phone number.
- **User Name**: Enter the user name required to connect to GSM Data network.
• **Password**: Enter the password required to connect to GSM Data network.
• **Line Type**: Choose a network connection type between Analogue and ISDN.
• **Speed**: Select the desired speed from 4.8, 9.6 Kbps and 14.4 Kbps.
• **DNS (000.000.000.000)**: Enter the IP address

**GPRS**
This setting allows you to change the settings for the GSM Data network (information provided by your network operator) as following:

• **Account Name**: Edit the account name.
• **APN**: Enter the access point name used for the address of the GPRS network gateway.
• **User Name**: Enter the User Name required to connect to GPRS network.
• **Password**: Enter the password required to connect to GPRS network.
• **Auth. Type**: Select the authorization type from Normal and Secure.

**Broadcast message**
This menu allows you to select your preferences to receive information messages sent by your network service provider.
Please contact your network service provider for further inquiry on this message service.

**Fun and Games**
This menu provides you with Java Games. You can use your phone as your entertainment center.

**Java**
Using this menu you can enjoy the embedded Java games and downloaded Java games or Java Applications from WAP. Follow the instruction of the application or game. Loading time will vary from applications to applications. There are embedded Java games for your mobile phone. (Depending on Software version). Press [Option] soft key (left) and select ‘Launch’ to execute the java game or application.
Java Settings
You can set audio, network profile, and free data space.

- **Java Audio**: allows you to set the Java audio sound to on or off.
- **Java Vibration**: allows you to set the vibration to on or off.
- **Java Network**: you can select the java network from the list.
- **Free Data Space**: you can view the free data space.
- **Heap Size**: you can view the remaining heap size, this is free memory space to run the game or application.
For your safety, please refer to the guidelines prior to using the phone. Failure to comply with the guidelines may cause malfunctions or be hazardous to the user.

Road Safety Comes First
Please be careful not to use the phone while driving. In case you need to use the phone, please pull over your vehicle first. In some countries, it is illegal to use a wireless phone while driving. Also, it is recommended to avoid using a mobile phone while refueling at a gas station.

Switch off in Aircraft
Mobile phones may cause interference to the aircrafts navigation system. Please make sure the phone is in switch off mode while in the airplanes.

Respect Special Regulations
Please follow special regulations in any areas wherever it is applicable. It is recommended to switch off your phone whenever it is illegal to use, or when it may cause interferences, such as in hospitals.

Interference
All mobile phones may be subject to radio interference, which may affect the performance during calling and receiving.

Qualified Service
It is highly recommended to have a repair service by qualified service personnel. Use only approved accessories and batteries.

Use Properly
Use only in the normal position (hold to the ear). Avoid unnecessary contact with the antenna when the phone is switched on.
Emergency Calls
When making an emergency calls, please ensure that the phone is switched on and is in service. Enter the emergency number (Official Emergency Number or another official emergency number) and press the [Send Key]. Inform your current location. Do not end the call until given permission to do so. You may end the call by pressing the [End Key].

Operating Environment
- Operation of any radio-transmitting equipment, including cellular phones, may interfere with inadequately protected medical devices. Consult a doctor or the manufacturer of the medical device if you have any questions. Other electronic equipment may also be subject to interference.
- Do not store or carry flammable liquids, gases or explosive materials in the same compartment as the phone, its parts or accessories.

Care and Maintenance
- Your phone is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you fulfill the warranty obligations and enjoy this product for many years.
- Keep the phone and all its parts and accessories out of the reach of small children.
- Keep the phone dry. Precipitation, humidity and liquids containing minerals will corrode the electronic circuits.
- Do not use or store the phone in dusty, dirty areas as its components may be damaged.
- Do not store the phone in warm areas. High temperatures can shorten the life of electronic devices, damage batteries and warp or melt certain plastics.
- Do not store the phone in cold areas. When the phone warms up to its normal temperature, moisture can form inside the phone, which may damage the electronic circuits.
- Do not attempt to open the phone’s casing. Non-expert handling of the phone may cause damages to your phone.
- Do not drop or knock the phone. Rough handling may damage the internal circuits.
- Do not use harsh chemicals, cleaning solvents or strong detergents to clean the
phone. Wipe out with a soft cloth slightly dampened in mild, soapy water.

- If the phone or any of its accessories are not working properly, take them to your nearest qualified service center. The personnel there will assist you, and if necessary, arrange for the phone to be repaired.

**Exposure to Radio Frequency Energy (SAR Information)**

This phone meets International requirements concerning exposure to radio waves. Your mobile phone is a radio transmitter and receiver. It is designed and manufactured, so as not to exceed the limits for exposure to radio-frequency (RF) energy, as recommended by the International standards. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The limits include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health.

The exposure standard for mobile phones employs a unit of measurement known as SAR (Specific Absorption Rate).

SAR level of your phone has been designed and controlled to be compliant with the recommended standards.

**Hearing safety:**

This product respects the current regulations for limiting the output volume of consumer audio devices to a safe level. By listening to your device with headphones or earbuds at high volumes, you run the risk of permanent damage to your ears. Even if you get used to listening at high volumes and it seems normal to you, you still risk the possibility of damaging your hearing. Reduce the volume of your device to a reasonable level to avoid permanent hearing damage. If you hear ringing in your ears, reduce the volume or shut off the audio player. This device has been tested with the supplied earpiece. Other manufactures earpiece may produce volume levels higher or lower than the delivered earpiece.
Precautions when using batteries

- Never use any charger or battery that is damaged in any way.
- Use the battery only for intended purpose.
- **No indication of charging:** When you start charging a battery that is empty or a battery that has not been used for a long time, it may take up to 30 minutes before the battery icon appears in the display.
- If you use the phone near the network’s base station, it uses less power; talk and standby times are greatly affected by the signal strength on the cellular network and the parameters set by the network operator.
- Battery charging time depends on the remaining battery charge and the type of battery and charger used. The battery can be charged and discharged hundreds of times, but it will gradually wear out. When the operation time (talk time and standby time) is noticeably shorter than normal, it is time to buy a new battery.
- If left unused, a fully charged battery will discharge itself over time. When charging after complete discharge, the phone will not display anything for about 30 minutes.
- Use only approved chargers. When a charger is not in use, disconnect it from the power source. Do not leave the battery connected to a charger for more than a week, since overcharging may shorten the battery life.
- Extreme temperatures will affect the charging capacity of your battery: it may require cooling or warming first.
- Do not leave the battery in hot or cold places, such as in a car in summer or winter conditions, as it will reduce the capacity and lifetime of the battery. Always try to keep the battery at room temperature. A phone with a hot or cold battery may not work temporarily, even when the battery is fully charged. Li-ion batteries are particularly affected by temperatures below 0°C (32°F).
- Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object (coin, clip or pen) causes a direct connection between the + and – terminals of the battery (metal strips on the battery), for example, when you carry a spare battery in a pocket or bag.
- Short-circuiting the terminals may damage the battery or the object causing the short-circuit.
- Dispose the used batteries in accordance with local regulations. Always recycle. Do not dispose of batteries in a fire.

**Battery care**

**Warning:** may explode if disposed of in fire.
Do not use your product in an area where a potentially explosive atmosphere exists.
Do not expose your product to open flames or lit tobacco products.

Do not expose the battery to extreme temperatures, near above +60°C (+140°F). For maximum battery capacity, use the battery in room temperatures.

Do not attempt to disassemble your product or battery. Only authorized personnel should perform the service.

Children: do not allow children to play with your mobile phone or its accessories. They could hurt themselves or others, or could accidentally damage the mobile phone or accessory. Your mobile phone or its accessory may contain small parts that could be detached and create a choking hazard.

Disposing of the battery: please check local regulations for disposal of batteries. The battery should never be placed in municipal waste. Use a battery disposal facility if available.
Manufacturer's Warranty
Subject to the terms of the warranty herein, the manufacturer warrants to the end user that TAG Heuer mobile products are free from design defects under normal use for a period of two (2) years from the initial purchase date and six (6) months for the product battery. If the product requires a repair covered by the warranty, return it to the authorized distributor from whom you purchased the product.

Warranty Service
If this product proves defective under normal use and conditions, the user must contact an authorized TAG Heuer repair service center to obtain warranty service authorization. Consequently, the user must provide the original receipt bearing the purchase date or warranty card duly filled up at purchase. The manufacturer reserves the right to invoice for administrative costs if it transpires that a returned product is not covered by the warranty in accordance with the terms described herein. Users returning their product explicitly agree that all personal data, applications, content downloads and personalised settings on the product will be lost during product maintenance. The manufacturer may not be held liable for the loss of such data.

Manufacturer's warranty
1. The warranty is only valid subject to presentation of a valid proof of purchase from an authorized TAG Heuer distributor. The said proof of purchase can be the warranty card delivered upon purchase and must bear the purchase date and the product's serial number (or IMEI code).
2. The present warranty only covers the TAG Heuer telephone, excluding the accessories (ear microphone and battery charger) supplied with the telephone. The battery is covered during a specific warranty period stated before.
3. The replacement or repaired product shall be guaranteed according to the same terms as the initial product for a minimum period of ninety (90) days or until the end of the initial warranty period, whichever is the longer period. All exchanged products or parts shall become the property of the manufacturer.
4. The present warranty does not cover: (a) defects due to normal wear and tear of the product; (b) material damage affecting the product's surface, including cracks and scratches on the product's screens or case; (c) defects resulting from an accident or modifications to the software or hardware, or damage due to contact with a liquid; (d) defects caused by installations, modifications, repairs or opening of the product by an unauthorized agent; (e) defects caused by use of the accessories supplied other than in accordance with the documentation; (f) defects resulting from the use of non-original accessories or those not authorized by the manufacturer as compatible.

Disclaimer of Warranty

the warranties and repairs stipulated above are exclusive of any other express, implied, written or verbal warranties, including implied warranties of merchantability and fitness for a particular purpose, conformity to any representation or description and non-infringement. the manufacturer shall not be held liable for any incidental, consequential, indirect or special damage or for any damage of any sort, nor for any financial loss resulting from or associated with the use or sale of the present product. Some countries, states and provinces do not allow the disclaimer or limitation of tacit warranties and liability for incidental or consequential damage, insofar as the foregoing limitations and exclusions may only be partially applied in your case.
